Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by McCarron 964,044.

end portion 5 and an open end portion (best shown in figure 2 adjacent shield 11), and a collar 4 located distant from any of the end portions listed above and at an angle between 60 and 180 degrees from a center line of the main container body. Regarding claims 2 and 3, the drawings depict the main part being well over 60 percent of the body, by default the main part would contain well over 60 percent of the glass.

Response to Arguments

Applicant's arguments filed May 17, 2002 have been fully considered but they are not persuasive. Applicants arguments directed to a rejection of the claims in view of Hall 246,879 is not understood. There is currently no rejection in view of this reference. Applicants arguments directed to the deficiencies of the prior art of McCarron 964,044 is not understood. The structure of McCarron which is equivalent to the claimed structure of applicants invention is clearly pointed out above in the rejection. Applicant has failed to add any structural limitation which would define the claimed invention over the prior art as applied.
